Resignation

Recd March 24 '93

Mint of the United States at Philadelphia, Pa.,

ENGRAVER'S DEPARTMENT,

March 13th, 1893

Sir

Isaac Lower entered the Mint Service June 1864 he has been a most faithful servant no man could have been more attentive to his duties than he, or more willing, and it is on account of failing health and age that alone compels me to part with him, which I do with feelings of sincere regret.

During all these years he has had the annealing of all the steel used for coinage and medal dies and has always performed his part of the operations of this Department satisfactorily.
